Nomos System DESIGN FOSTER AND PARTNERS

Versatile and extremely hardwearing, Sistema by Nomos (pioneer of almost all shared structure systems and a recognised icon of industrial design) can be used in a variety of contexts, from the individual workplace to long shared work stations, from the small meeting table to large modular conference tables. The system was created with the aim of using to the full the characteristics of quality of the structure and the tubular metal and aluminium legs by combining them with the practical and combinable characteristics of the modular tops to organise the workplace in such a way as to enhance the image of the context.

TE-NOM-05-19

A wide range of accessories, from screens to electrification to front office solutions, personalise and optimise the performance of the system. The legs are finished in chrome or in white and dark grey painted, matching the combinable laminated tops in black or white and dark grey lacquered; the various types of wood, available for the desktops and service tops, are featured throughout the Tecno collection: graphite oak, dark oak, light oak, walnut and mahogany are characterised, as in the enamelled version, by the shaping of the table edge.

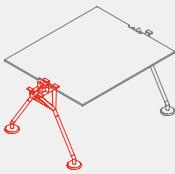

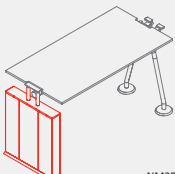

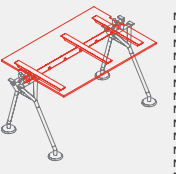

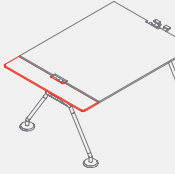

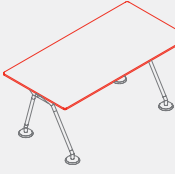

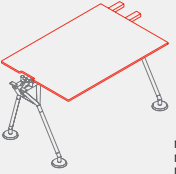

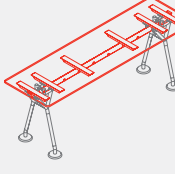

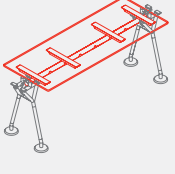

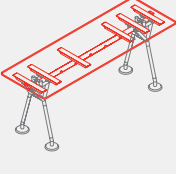

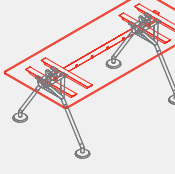

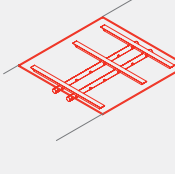

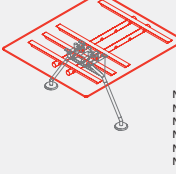

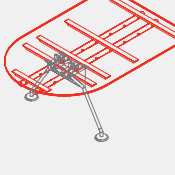

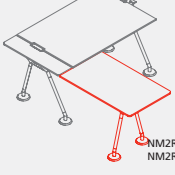

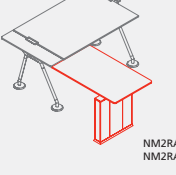

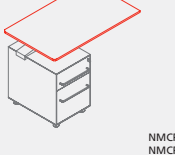

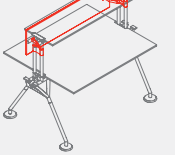

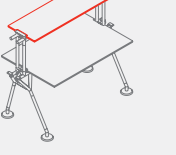

The elegant tops in clear and painted extra-light tempered glass on the underside can be freely combined with the other finishes. The series is completed by the cabinets and drawer units of the Basic collection, which may be personalised both in the choice of colour and type and used in all the workplace systems.
