www.deprojectinrichter.com  
088 - 650 12 34

A product of natural inspiration and extensive research, Gregg's shape is reminiscent of a large pebble, its surface polished by the water. It could even be seen as the egg of some mythological beast, a symbol of creation and re-birth. Pure volume with a familiar ease of interpretation, yet one that is surprising, because Gregg's asymmetric shape changes depending on the point of view of the person observing it. This is a new solution where a traditional material like glass becomes a tool in the designer's hands to give an original character to an environment.

There are three different sizes in the hanging, table, ceiling and wall versions and four different solutions for the floor lamp: the Gregg collection is one of the most versatile and transversal and can be easily placed in any type of setting. In the home environment the warm, uniform light produced by the white satinised diffuser and its essential style have a strong functional and decorative value. Thanks to the closed shape of the diffuser, the bulb is screened in all directions, which protects from dazzle and makes it easy to place even at different heights.

When part of a composition, Gregg is suitable for some of the most surprising uses. A 'raindrop' structure highlights the vertical extension of a window or stairway, producing an extremely striking effect. Vertical arrangement of a multitude of suspensions at various heights generates spectacular luminous false ceilings. The repetition of the volume along a line produces new perspectives to create trompe l'oeil effect.

## Description

Wall or ceiling lamp with diffused light. White satin finish hand-blown diffuser achieved using glass blowing procedure without turning the glass in the mould (referred to as "stationary"), subject to immersion in acid. The glass in the medium version is incorporated with a matt transparent injection moulded polycarbonate ring nut, which is in white polycarbonate in the small version. Mount and ceiling/wall mount in epoxy powder coated metal and matt injection moulded transparent polycarbonate lamp holder support.

**Materials:** blown satin glass and white lacquered metal

**Colours:** bianco

## Brightness

semi-diffused and direct down light

# Gregg, floor design Ludovica+Roberto Palomba 2010

FOSCARINI

A product of natural inspiration and extensive research, Gregg's shape is reminiscent of a large pebble, its surface polished by the water. It could even be seen as the egg of some mythological beast, a symbol of creation and re-birth.

Pure volume with a familiar ease of interpretation, yet one that is surprising, because Gregg's asymmetric shape changes depending on the point of view of the person observing it.

The floor version is available in two heights,

which have been standardised to take a medium or large diffuser. The result is four different solutions for a range of setting possibilities. The small version can be used as a reading lamp, to light corner seating discreetly yet efficiently, while the large version is perfect as a signal or to light an area with the soft, uniform radiance that characterizes it. Using different sizes in compositions also offers the possibility to create an interplay of extremely dynamic effects.

In the home environment the warm, uniform

light produced by the white satinised diffuser and its essential style have a strong functional and decorative value. Thanks to the closed shape of the diffuser, the bulb is screened in all directions, which protects from dazzle and makes it easy to place even at different heights.

# Gregg Outdoor, sospensione design Ludovica+Roberto Palomba 2013

FOSCARINI

Frutto di ispirazione naturale e di approfondita ricerca, la forma di Gregg ricorda un grande ciottolo levigato dall'acqua, oppure l'uovo di un animale mitologico, simbolo di creazione e rigenerazione. Realizzata in polietilene, materiale leggero ma resistente agli urti e alle intemperie, Outdoor Gregg è disponibile nelle versioni da appoggio e da sospensione, in tre diverse misure: media, grande ed extralarge, per integrarsi in ogni situazione e per creare libere composizioni, giocando fra diverse dimensioni e altezze.

Molteplici le possibilità di utilizzo, duplice l'emozione: di giorno con una forma organica e pura, di notte con una calda luminosità. Decorazione e illuminazione allo stesso tempo, Outdoor Gregg si presta a caratterizzare diverse situazioni: una terrazza coperta, un padiglione in giardino, un patio, così come un ambiente living all'aperto, esprimendo uno stile di vita che ricerca un nuovo, raffinato rapporto fra il design, la natura e l'architettura.

# Gregg Outdoor, sospensione

## info tecniche

**FOSCARINI**

### Descrizione

Lampada da sospensione a luce diffusa. Diffusore in polietilene stampato in rotazionale con invito diretto per l'assemblaggio alla base in lega di zinco verniciato a polveri poliestere. Cavo elettrico rivestito in neoprene per uso esterno, senza rosone, dotato di morsettieria IP 65 e seconda spina Schuko.CEE 7/7 IP44.

**Materiali:** polietilene

**Colori:** bianco
