New Products:
Compelling Design, Convincing Functionality.

Dear Customers,

For many years we have been developing and manufacturing furniture of the highest standards. We have done so and continue to do so with enjoyment and with passion. We place equal emphasis and importance on outstanding quality, on innovative functionality, on discerning design and it is our quest to enable you as the user to derive the maximum possible utility from the furniture we produce.

It gives us tremendous satisfaction to present you with our eleven new innovations, all of which are featured within this brochure and span the full spectrum of contract applications.

A seamless entity – that's the impression A-chair conveys. A-chair is our unique new stacking chair, geared very much toward large capacity venues and strikingly convincing in its design. Our highly successful fina conference series just got finer with a generic multi format table system born effortlessly into its large and distinguished family. Creative processes need room to evolve and this is a need met by the inherent modular nature of the fina table. Another design highlight: our premium modular loungescape plot will add an upscale touch and multilevel impact in waiting areas and other environments.

In addition to new products, we continue with our exploration and development of sophisticated and innovative detail solutions, in order to provide even greater efficiency of handling. Cases in point include the STS stabalisation system on our new basic folding table, or the horizontal rolls that allow our stacking table pivot to be rolled aside simply by tilting.

A-chair

event

Variety thanks to modularity – the new standard for different areas of application.

- independent design
- modular construction
- die cast aluminium or plastic frame
- choice of plastic or plywood for seat shells
- seat shells and frames can be combined freely
- with or without armrests
- vertically stackable
- optional row linking
- optional seat and row numbering

Design: jehs+laub

The Modular All-Round Chair: A seamless entity.

Elegant yet unique – these are the important design characteristics of A-chair. If you regard it from the side, the silhouette is reminiscent of the letter "A", hence its name. An essential component of the design concept is the slim legs. Placed in a row, only the width of a single leg will be visible, which has a great calming effect on the overall impression. A-chair does not distract from the architecture – not even with 1,000 chairs in the same room.

9708/A

9708

With its many colour variations, this chair for large venues blends in with any architectural style.

Whether with or without armrests: A-chair always provides highest seating comfort thanks to its ergonomically shaped seat shell and armrests.

9708/A

Plastic, aluminium
or shaped wood:
shells and frame
can be combined
freely.

9704
with through
liner in leather

Thanks to its modular construction, the seat shells and frames of this all-purpose chair can be combined in many variations – creating exciting contrasts or a harmonious entity. The die cast aluminium or plastic frames can be configured with seat shells made of different materials and featuring different colours. What is new and unusual is e.g. the combination of plastic frame and shaped wood seat shell.

Plastic shells one-coloured

For the plastic shell, there is a choice of seven different colours.

The different materials allow for creating interesting accents.

9702

9704

Thanks to its optional row linking, A-chair is perfectly suited for large events.

Stacking pads protect the frame and provide longevity.

For particularly high seating comfort, A-chair is also available with seat liner.

Also available: row and seat numbering for professional event operation.

A-chair possesses all the functionalities that a chair for large venues requires – even if it may not look it at first sight. A case in point: A-chair is vertically stackable up to 10 chairs high, saving lots of space. Optionally available: row linking as well as seat and row numbering. For especially high seating comfort, A-chair is also available with armrests. Moreover, different upholstery variants can be chosen.

fina conference

office

High quality conference table system.

- many combinations possible
- even very large table formats available
- perfect media integration
- classic design, a perfect match for finasoft
- frames with one, two or four columns
- modular feet construction

Design: Wolfgang C.R. Mezger

fina conference:
the High-End Conference Table.

Each conference is different. With the timelessly beautiful series fina conference, the most diverse table configurations can be created. Different frames and table tops can be combined to fulfil the respective design concept and to provide the required seating space, always forming a visual entity – regardless of whether 4 or 40 places are required. Even extremely large table formats are possible.

fina conference allows even for extremely large table formats. So that up to 24 people can sit around one table.

6732/AG | 6912/8, 640 × 220 cm

With fina conference, depending on the requirements, numerous table formations can be created: U-shape, rectangle, soft square or square. Even special formats are possible as e.g. triangular or droplet shape.

High Stability, Lots of Legroom

The especially large round table top is supported by a four column frame consisting of polished die cast aluminium feet and of chrome plated steel tube columns. They make this table particularly sturdy while offering lots of legroom all around.

6722/A | 6924/1

Thanks to the modular construction of the feet, many different frame variants are possible for fina conference: whether with T-shaped feet (with or without rib) or with Y-shaped feet (with rib). Always convincing: the soft design, reduced to the very essentials.

6910/0
with T-base

6910/0
with T-base and brace

Beautiful variety: the frame is available with T-shaped or Y-shaped feet, with or without ribs.

6922/0

6920/0

The central column frame is best suited for small and medium-sized table tops.

6924/1

Perfect connection: for extra-large table tops, double or four-fold column frames are available.

6722/A with new
cushion upholstery
6910/0

Cable lids and channels
nearly completely hide the electrical connections.

Vertical cable ducts
For each variant, there are matching accessories to route cables along the table legs.

Horizontal cable ducts
Cable ducts mounted underneath the table top can also hold larger numbers of cables.

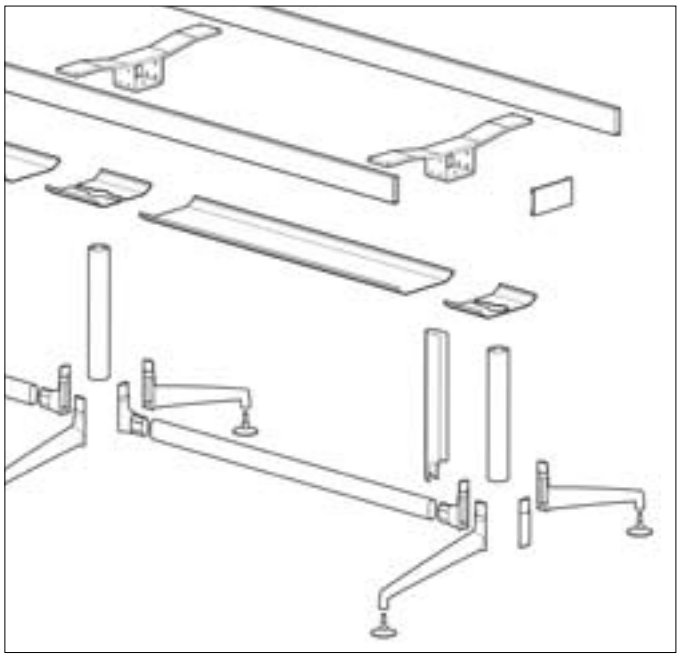
6756/A | 6932

Modern conference technology calls for a high degree of electrification and signal conduction. That's why fina conference is optionally available with sophisticated cable management. Different horizontal and vertical cable duct solutions, firm and flexible, create orderliness and safety in the conference room.

Sophisticated Functionality Creates Room for the Essentials.

An important characteristic of fina conference: the modular frame construction, making the many variants possible in the first place. The table tops are also available in different formats – from circular to ellipsoid to rectangular. For table top surfaces, there is a choice of robust HPL coating or oak or American walnut veneer. The table top featuring the new beveled CRK edge comes across as particularly delicate.

CRK-edge
The new beveled edge gives the table top a delicate look and feel.



The principle
of fina conference is the modular frame construction.

fina bar

cafeteria

Bar Stool with Plastic Seat Shell – Perfectly Suited for the Cafeteria.

- matching bar stool for the fina series, with plastic seat shell
- 4 leg frame of solid wood metal sled base
- purist design
- easy-to-clean seat shell available in three colours
- sled base version stackable

Design: Wolfgang C.R. Mezger

Robust and Purist.

Versatility – that's the characteristic for the fina series. Matching the plastic seat shell models, there now is also a bar stool. Its essential design element is its purist – with its shaped plastic seat shell. Thanks to its two frame versions, it will fit quite different design concepts. The four-legged frame made of solid oak wood has a noble look and feel, providing an interesting contrast to the robust plastic shell. This version is the perfect companion for fina wood and many other series featuring a wood frame.

With its choice of frames, this bar stool will fit different design concepts.

6801

Delicate and reduced to the essentials: the sled base frame made of chrome plated round steel tubes.

The delicate stackable sled base frame made of chrome plated round steel comes across as light and reduced to the bare essentials. Less is more: the sled base frame's purist design lets the seat shell seemingly float in mid-air. The shell is made of easy-to-clean plastic and available in three colours.

Apparent Opposites Combine to Form an Interesting Entity

- complementing the fina series
- innovative laminated wood technology
- with or without armrests
- high-quality shell made of plastic or wood
- different upholstery versions
- exciting design
- stackable

Design: Wolfgang C.R. Mezger

The Perfect Combination of High-Quality Plastic and Classy Wrought Wood.

The particular charm of fina wood consists in its combining the high quality fina plastic seat shell with a beautifully shaped oak wood frame. Thus fina wood perfectly complements the versatile fina series. A further distinctive feature is the innovative laminated wood technology with its continuous oak veneer layers, giving the impression of solid wood. This technology allows extremely slim cross-sections. The shaped wood from domestic forestry is splinter free, robust and thanks to its smooth surface easy to clean. The chair is lightweight yet sturdy.

6808

Thanks to invisible connections, nothing disturbs the fluent lines of the wood frames.

6808/A

The seat shell is perfectly embedded in the rib frame. This makes the chair look good from all sides. The shell is available as a noble looking plastic version or made of oak wood, with a finish of several matte lacquered stained hues. The seat shell is available in a selection of different upholstery variants and provide even more seating comfort. With or without armrests – both design versions are stackable, even alternatingly.

Different upholstery variants make fina wood even more comfortable.

Plastic Armrest and Cushion Upholstery: New Options for Even More Possibilities.

The four-legged chairs of the successful fina series are now available with an easy to clean plastic armrest. Ingenious: The combination of white plastic and chrome frame. Moreover, a comfortable cushion upholstery is now available for the fina soft series. For this option you can choose from leather and further fabrics from our House Collection.

6458/A
Tone-in-tone harmony: the new plastic armrest matches the white plastic seat shell. But interesting colour contrasts can be achieved as well.

6722/A
The cushion upholstery made of high-quality leather has a noble look, upgrading any office.

fina family . fina

The chairs of the successful fina series are available in numerous variants. This makes fina the right chair for any occasion. Available in a 4 leg, sled or swivel base, plastic or laminated wood – fina is always the right choice. Furthermore different upholstery options are available.

The Functional Folding Table Featuring Many Intelligent Details

- innovative stabilisation system STS
- Brunner folding mechanism
- long-lasting Air-Protect edge "APK"
- high-quality table top surface
- two frame variants
- glides for every floor surface available
- straight-lined design

Design: Roland Schmidt Design

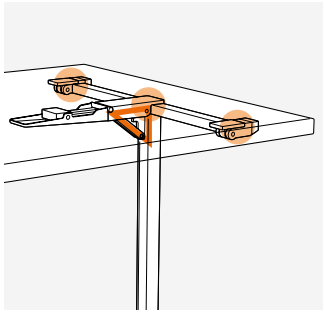
Maximum Safety Thanks to the Stabilisation System Featuring 3-Point Support and Diagonal Brace.

basic is equipped with the new stabilisation system STS. The folding mechanism featuring a diagonal brace and 3-point support assures maximum stand solidity and stability. The mechanism works nearly noiselessly and does not need any maintenance, as there is no wear and tear. Thanks to the integrated positioning latch holding the folded table legs in place, basic can be transported safely. The table top surface is made of high quality HPL or real wood veneer. Particularly long-lasting: the exceedingly robust Air-Protect edge APK made of elastic plastic, featuring an interior air chamber.

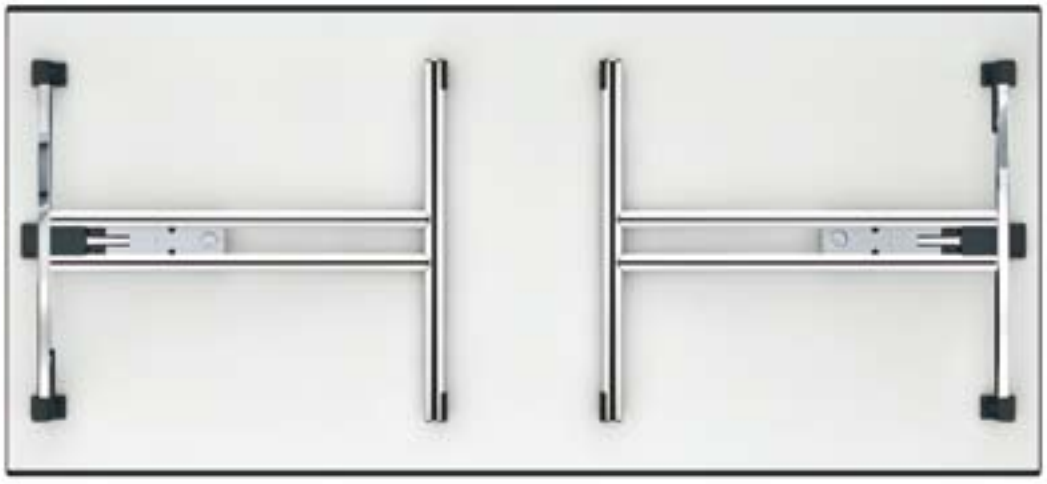
Closed tube ends
The tube ends of the frame are optionally closed. This not only looks good, it serves also as a protection against vandalism.

Air-Protect edge APK
The new Air-Protect edge APK made of elastic plastic is particularly robust.

Low stacking height
In the standard version: 105 mm (table tops of increased strength have a different stacking height).



Stabilisation system STS (concept sketch) featuring a 3-point support and a diagonal brace.



2910

Stabilisation system STS (concept sketch) featuring a 3-point support and a diagonal brace.

Visually, basic is convincing thanks to its clear and straight-lined design. The great-looking frame made of chrome plated oval tubes is available as a single or double column. The closed tube ends give a noble impression and are vandalism proof. The table row connection allows several tables to be combined to form one stable configuration.

Sophisticated: the table row connection is easy to handle and combines several tables to form one stable configuration.

The Perfect Stacking Chair for Large Venues – Thanks to the Innovative Multi-Functional Element MFE.

- stackable up to 20 chairs high
- self-centering stacking
- protection of metal parts
- three-dimensionally shaped seat shell in two variants
- invisible bolt connections
- optional row linking (also available as panic-safe version)
- optional row and seat numbering

Design: Roland Schmidt Design

4604-61

4604-60

The Stacking Chair of the New Generation.

Simple handling and high seating comfort are important requirements for event operation. The fourlegged chair hero with its innovative multi-functional element MFE is perfectly appropriate to meet these requirements. Thanks to MFE, up to 20 chairs can be vertically stacked on top of each other, saving lots of space. The stacked chairs are centred by this element consisting of high-quality plastic, and the metal parts of the delicate frame are protected. The three-dimensionally shaped seat shell made of shaped beech plywood is particularly comfortable and allows very small radii of shell and frame.

Different upholstery variants. Always beautifully shaped and even more comfortable thanks to the different upholstery variants – that is hero.

4604-60
with seat liner

4604-60
with seat and
back liner

4624
fully upholstered

Multi-functional element MFE with row linking
The multi-functional element MFE can also be equipped with a panic proof row linking device – making hero ideal for events.

Row numbering
The optional row numbering is easy to attach.

Seat numbering
Also available: seat numbering integrated into the multifunctional element.

Innovative
The seat shell made of shaped beech wood has been shaped in all three dimensions, allowing for very small radii of shell and frame.

Optionally, the multi-functional element can also accommodate row numbering as well as a seat numbering. A panic proof row linking it is also possible. A knee roll ensures comfortable sitting even for an extended period of time, because this roll supports proper blood circulation. The seat shell is available in two silhouettes: straight or waisted. For even more seating comfort, there is a choice of different upholstery variants. hero moreover knows how to convince by its modern and reduced design.

Vertically stackable up to 20 chairs high. 4604-61

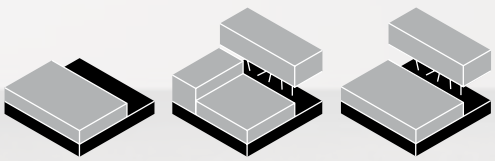
Stacking protection and tight stacking thanks to the multi-functional element MFE
The multi-functional element MFE protects the frame and centres the stacked chairs. This allows for particularly tight vertical stacking.

plot

lounge

Sit As You Like It: Modular Loungescape for Public Areas.

- inspiring and spatially formative design
- high quality materials
- flexibly combinable elements with the same base sizes
- variable use for working, relaxing and communicating
- numerous colour combinations
- expandable thanks to spatially formative faceplate screens



Design: osko+deichmann

Surprisingly Versatile: plot is Always Different and Always Unique.

Whether it's for communicating, for working or simply for relaxing – plot can be used in many ways. With a square base module and variable seating surfaces on three different levels, a great variety of seating landscapes can be created. plot has been conceived so that the three upholstered levels can be used as back rest, table, bench or seat, respectively. The unconventional design moreover creates an open atmosphere inspiring creativity. But plot can also be different: in its screen version, back and side parts create calmed down areas – for private conversation or simply for relaxing.

Whether as one- or two-seater – plot screen creates calmed down zones for private phone calls, for working or simply for relaxing.

PL520
with screen and
Kvadrat-Diva cover

plot offers seven different colour sets, making this loungescape fit any design or colour concept – from the airport lounge to the hotel lobby. In addition, plot is also offered in two monochrome color combinations seat and side surfaces can also be covered with selected fabrics from the House Collection, e.g. with the high-quality fabric Kvadrat Divina.

Even with only one colour per unit, plot is very impressive – here it is covered with the high-quality fabric Kvadrat Divina. Thanks to the many different modules, the result still offers lots of variation.

plot desk and screen:
a swivel table mounted to the base element serves as a surface to put down a coffee mug, notebook or magazine. Back and side parts create quiet niches for more privacy.

PL510
with screen and side table

plot plant:
with the optional plant basket, the loungescape turns into a green oasis.

plot basket:
the powder coated steel wire basket can replace an armrest and provide additional space to store personal items.

With the optional accessories, plot becomes even more versatile: an armrest can very easily be replaced by the practical plant basket or a very useful wire basket for personal items.

crona

lounge

Comfortable Lounge Chair with Fresh Design.

- visually light impression
- fully upholstered shells with closed armrests
- particularly comfortable thanks to an additional cushion
- upholstery in one or two colours
- two delicate frame versions
- spider frame also available with castor wheels

Design: Archirivolto

Visually Light Impression and Very Comfortable.

An inviting and fresh design – that is crona. The fully upholstered shell with its closed armrests provides a high degree of seating comfort, and an additional cushion makes sitting even more pleasant. This makes crona the ideal companion for lounge and cafeteria. This modern lounge chair is available in table height equipped with a sled base frame or a spider frame with or without castor wheels. The full upholstery in one colour features an interesting look: a parting seam between the upper part of the backrest and the seating part below. This lounge chair comes across as particularly sophisticated with two-coloured upholstery featuring the material combination of leather/fabric. The upper part made of leather provides ideal protection for armrests and backrest from wear and abrasion. Selected fabrics of the House Collection are available as cover fabrics.

Sophisticated: the parting seam between the upper backrest and the lower seat presents an interesting look.

6365/A

6361/A

6363/A

pivot

event . cafeteria

Innovation in Functionality.

- functional nesting table
- simply tilt and roll
- table top automatically locks in place
- foldable foot frame
- nesting space-saving
- available in two heights

Design: osko+deichmann

The Stable and Functional Stand-Up Table.

This bistro table is particularly practical thanks to its innovative horizontal roll. On the one hand, this serves as a table foot. On the other hand it enables easy transport. If the table is placed horizontally, the horizontal roll rests on the floor: the table is in a stable and secure position. But if it is tilted, this folding table can be transported quite simply and without further handling. In order to store it in a space saving way, the foot part of the frame can be folded by means of a locking lever, and the table top can be turned to a vertical position. Like this, the table can be stored taking up only very little space. When it is needed again, the table top locks into place automatically when put up. The table is available in two heights: 74 or 108 cm.

3058

3056

If the table top is folded and the table itself is tilted, it can be easily rolled away. With the help of the locking lever you can bring the leg extensions to a flat line. Thus the table can be stored in a space-saving way. Furthermore, the table can be slightly tilt even in the set-up status and can be rolled to another position.

Disengage locking lever
To fold pivot and store it then in a space-saving way, you first have to disengage the locking lever by pushing the lever softly.

Fold up table top

Turn locking lever – foot frame will fold in
If you have folded up the table top, you just have to turn the locking lever again to pivot the leg extensions in the flat parking status.

Tilt table and transport it on its rolls integrated in the base frame
Now you only have to tilt the table slightly and you can roll it easily and stagger it in a space-saving way.

Space-saving storage, vertically staggered

due

cafeteria

Shapely Cafeteria Series.

- new interpretation of classic bistro furniture
- surprising combination of materials
- available in different plastic colours and stains
- seat and back made of easy-to-clean plastic
- sophisticated connection details
- tables following the same design tonality

Design: Wolfgang C.R. Mezger

The New Interpretation of the Classic Bistro Chair.

due is being manufactured using classic cabinet making connection techniques. The series is modern, contemporary and sophisticated with its new combinations of materials. The frame of this four-legged chair is made of solid beech wood and the seat and back are made of easy-to-clean plastic. The connective element between the plastic back and the wood frame always sports the same colour as the back.
The solid beech wood frame is available in several stained hues. For the seat and back, seven different colours are available. Thanks to the different wood appearances and the many possible colours for seat and back, due will fit the most versatile design concepts.

The organically curved armrests are perfectly integrated into the frame structure.

hoc

universal . cafeteria

Straight Design, Sculptural Formal Language.

- classy stool and bar stool made of shaped plywood
- design reduced to a minimum
- natural lacquer finish, stained, matte or covering varnish
- optionally available with comfortable seat liner
- matching stand-up tables, tables and benches available
- tables and stools in two heights

Design: jehs+laub

Bar stool and stool are licensed by Davis, Furniture, USA

The Sculptural Stool – Clear Design, Reduced to a Minimum.

Three identical parts made of shaped plywood combine with an elegant sweep to form a seating surface. This is hoc, the modern interpretation of the archetypal stool. Purity reduced to an absolute minimum. Rather a sculpture than a piece of seating furniture. Its form, open to all sides, allows for flexible seating that strengthens one's back and encourages for relaxed communication. With its high-quality manufacture and finish, hoc fits into every modern environment. The stool is available in two heights: as a barstool equipped with a circular foot rest, and in a shorter version – which even is stackable.

The tapered veneer creates an elegant design.

A seat liner makes hoc particularly comfortable. For this, all the fabrics of the House Collection are available. Upon request, the liner can sport a decorative seam.

Also possible: hoc with a surface of easy-to-clean and robust HPL.

hoc his available in two different heights: as a barstool featuring a comfortable circular foot rest and as a shorter stool without footrest. In this version, hoc is stackable.

A selection of beech wood with a natural lacquered finish or varnished in the colours of the Colour Collection. Also possible: oak stained light, wenge or black, with a matte lacquer finish.

A chair like a sculpture.
The metal ring underneath the seat surface creates stability.

Tables matching the stools, barstools and benches are available in two different heights. They are manufactured from shaped plywood parts, stabilized by a diagonal metal brace in an elegant chromed finish. hoc is made of threedimensional shaped laminated wood. The face veneer can be beech, oak or white HPL. In this way, islands of communication can be created that are beautiful to look at while being reduced to the essentials, inviting relaxed conversation. The series is complemented by matching benches that take up the purist design of the hoc series, creating an overall impression that's all of a piece.

Doing away with a backrest makes for upright sitting, strengthening one's back. This also creates a communication situation that is open towards all sides and very relaxed.

twin

event . cafeteria

Functional Complements for this Colourful Plastic Chair.

- high quality and weatherproof
- made of robust polypropylene
- visual lightness thanks to delicate formal language
- lightweight yet stable
- stackable
- now also available with: row linking and seat liner

Design: Archirivolto

New Functions, Even More Areas of Application.

twin is the stable plastic chair – colourful, lightweight and weather-proof. Made of one piece and reduced to the essentials. We now offer a row linking system for it, e.g. for outdoor events. And for even more seating comfort, twin is now also available featuring a seat liner. Formally matching tables complement the series.

Equipped with the optional row linking, the weatherproof twin is now also ideally suited for big outdoor events.

3102 | 3102/A with leather seat liner table 3160/1

With a seat liner, twin is particularly comfortable. For this, all fabrics of the House Collection are available.

Notes

See our current pricelist for details, prices and terms of business. We reserve the right for technical changes, errors and colour variations. Some of the models depicted are special versions that are subject to additional costs.
Wood is a natural product. For our lines of furniture, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the wood, there may be variations in colour. Differences in colour and structure do not constitute a reason for complaint but are rather a manifestation of the individual character of wood furniture.
