Designer

Sebastian Herkner

Designed to be modular, multifunctional and can be converted into any look. With four different heights and fully upholstered reversible cushions it enables a broad range of applications.

DeVorm

Specifications

Body
Plywood, High Resilience Foam
and Fabric

Legs
Solid oak or ash, Clear

Ingredients

Beech plywood

Ash or oak legs

Electro galvanised hanger bolts

High Resilience Foam

Fabric

Felt gliders

Multifunctional

The Arnhem Loveseat is multifunctional. Its modularity enables a broad range of applications. It is very suitable as a multifunctional workspace, in which one can concentrate and enjoy some privacy, as well as in a meeting place or waiting area.

Its side and backrests are horizontally stackable, which means they can be attached in three different heights and therefore enable the application to be an open community seat as well as an enclosed room-in-room space.

Bespoke option

Customize the colour of the legs

When ordering a minimum of 5 Arnhem Loveseats of the same design, the colour of the legs can be customized.

DeVorm

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
