Confair®.

440 range

Confair® range

Design: wiege, Fritz Frenkler, Justus Kolberg
Folding table: Andreas Störko
Model 440/21

The Confair folding table:
Dynamic, space-saving – and attractive.
It has won some of the highest international
design awards and has a firm place on many
an executive floor too.

The combination of dynamic structures with high design quality means value-added for management techniques that naturally require optimal promotion of participation in change processes.

Confair®. Dynamic interaction.

Identity and innovation – the key to tomorrow's success. To combine continuity and dynamic change is perhaps one of the prime tasks of modern management. Whether that can be achieved is largely a question of communication culture. And thus of the design of interiors for teamwork and conferences ...

The Confair range stands for the perfect combination of image building and innovative strength: high design quality, fine materials and unmistakable design support team spirit and a sociable image. At the same time, modularity, mobility and innovative functions promote participation, self-organization and interaction – and coincidentally reduce space costs too. It is therefore not surprising that Confair has become an international model of excellence within this market segment.

Confair® folding table

The barrel-shaped or rectangular tables can be activated by one simple movement – and can be linked by means of snap connectors to form conference configurations, if required.

Confair pinboard

Simple, yet ingenious: the curved foot sections of the easy-to-handle, lightweight pinboards allow them to be positioned radially and compacted efficiently.

Confair chair

With characteristic, distinctive design and highly versatile: the stackable seminar chair may be accessed from any side and the backrest can even serve as a perch.

Confair mobile desk

The extremely light mobile desks with an integral pen tray may be freely positioned as required and neatly compacted with the tops pivoted.

**Confair® lectern**

The lectern is a mobile, elegant, and re-assuring performance aid. With its slender perforated steel fascia and easy handling, the lectern has won an established place on press and lecture platforms.

Confair server

The mobile servers for catering, office utensils, A/V and presentation technology have two retractable cable management channels. Various configuration options are available comprising shelves, open boxes, drawers or cable stations.

Confair flipchart (not shown)

The board of the lightweight flipchart with a retractable frame has three adjustable height positions and can easily be removed for transport.

Confair®. From a workshop to a conference.

With Confair, it is child's play to use intelligently designed conference and communication interiors for versatile applications. Only one person is required to set up, reconfigure and store the mobile folding tables: without any tools, locking and releasing procedures or specialized knowledge. Snap connectors allow multi-directional linking options. If a room can be extended quickly due to variable room partitioning, meeting and project tables can be transformed into a large conference configuration with a few swift movements. Confair folding tables are an even more attractive option as investment in such a convincing furnishing solution will soon pay dividends ...

On the one hand, the ingenious folding mechanism and the large lockable wheels ensure easy operation and high mobility. On the other hand, the elegant and high-quality design supports a communication culture on the highest level: for applications ranging from spaces for meetings and project work to the executive floor.

If required, cable channels, power supply connections and innovative technical modules are available that provide fascinatingly simple, interactive access to modern media technology. For a perfect synthesis of dynamic space utilization, high aesthetic quality and state-of-the-art technical functionality.

Spacious, graceful and high-calibre: a conference configuration to accommodate 40 comfortably. If required, table tops may be specified so as to form boat-shaped configurations when linked.

A perfect team: stackable cantilever chairs from the Sito™ range.

Design and function of the highest degree: folded up, the mobile table is sure to turn heads. Unfolded, it seats eight comfortably.

For smaller layout opportunities, the Timetable™ range is the ideal complement to the Confair® folding table for areas of application in which compact table formats are the order of the day. The lipping and surface finishes of the table tops that are pivotable along the horizontal axis may be perfectly coordinated with Confair folding tables.

As all Wilkhahn® ranges, Confair® may also be individually specified to integrate with existing interior design themes. The polished and clear anodized table frame harmonizes with the matt chromium-plated Sito™ cantilever chairs while the table top matches the finish of the walls and doors.

The combination of Confair® chairs and folding tables allows a fast changeover between various forms and methods of interaction. An ideal addition: the mobile InterWall® for high resolution visual display and processing of digital information in seminar and team environments. When not required, the desks may be compacted efficiently and moved aside.

Communication workshop with ground-breaking characteristics

"Reshape the environment, don't try to reshape men." (Buckminster Fuller)

The more directly people are involved in communication processes, the more efficiently and faster it is to implement innovation and change. If people set up their teamwork and conference interior themselves and change it dynamically, they will be able to identify more easily and faster with the process in hand.

For this very reason, Confair has been designed as a toolbox, allowing participants to "help themselves": for conveying information and presentations, for collecting ideas, for working in break-out groups, for formal decision processes or open discussion sessions. This allows a neutral space to be self-organized and used in a versatile manner – resulting not only in more economical use of space but also savings in terms of facility management capacity too.

Confair has been designed as a coherent, extremely high-quality range with a view to encouraging both staff and management to appreciate the importance of such conference processes.

Changeover of methods in no time at all.

The number of participants, contents and methods of a meeting require a coordinated furnishing layout for optimal support of communication processes: ranging from a seminar, a meeting, a conference, project work and break-out sessions to presentations and discussions. The Timetable range offers a complementary smaller table version to the Confair folding table and other Confair units. Table tops are pivoted upward for efficient, compact storage. This means that communication interiors can be adapted to selected methods of communication with literally one swift movement.

9 am: Seminar

1 pm: Meeting, Conference

Quality of details

Often copied, but still unrivalled – with Confair this is more than merely a question of aesthetic differentials. For the quality of a detail plays a decisive role in the quality of the whole:

- The frame structure of all Confair models comprises aluminium profiles, supporting frames, bases and foot sections in die-cast aluminium. This ensures precision with minimum weight. Polished, anodized, coated or chromium-plated finishes permit finely honed coordination with individual design concepts.

- The table tops comprise stiff yet lightweight blockboard cores with laminated wood lippings, additionally protected by an integral impact-resilient profile. Mobile desk tops, flipchart board and walls of the server boxes are in birch plywood. Depending on the model and application, the choice is between a finish in fine veneer, linoleum or laminate. Shelves and the base of boxes are in black steel with a textured coating. Materials and surface finishes thus provide both longevity and flexible layout and application.

- The use of high-performance plastics, such as polypropylene and polyamide, through-dyed in black, mean that scratch marks are hardly visible, even in extreme wear conditions.

- Last but not least, every single component may be exchanged on all Confair models. This guarantees aesthetic and technical updating at any time.

Subject to technical change without notice.

Model

444 / 4 Chair
Stackable, with exchangeable covers according to Wilkhahn fabric and leather collection.
58 x 54, H 76
(22⁷/₈" x 21¹/₄" , H 29⁷/₈")

Model

441/1 Mobile desk
On castors; with pivotable top for compact storage; desk top with tilt function; integral pen tray and edge profile.
46 x 45, H 73
(18¹/₈" x 17³/₄" , H 28³/₄")

Model groups

445 and **446** Server
Mobile, versatile accessories for catering, material for interactive sessions or presentation media.
46 x 59 (18¹/₈" x 23¹/₄")
(overhead 91 (35⁷/₈")),
H 96/107 (H 37³/₄" / 42¹/₈")

Standards and certifications. UN Global Compact, ISO 9001/14001, EMAS, GREENGUARD™, LEED, GECA

3 pm: Break-out groups

5 pm: Presentation

Model
448/9 Lectern
Mobile, with desk top (optionally with additional shelf), and modesty panel in coated, perforated steel; space for company logo.
46 x 51, H 106
(18 1/8" x 20 1/8", H 41 3/4")

Model
442/1 Flipchart
Foldable, with removable writing panel with three adjustable height positions, steel pins and black holder for paper pads, and pentray.
75 x 67, H 180/200
(29 1/2" x 26 3/8", H 70 7/8" / 78 3/4")

Model group
440 Confair folding tables
Boat-shaped or rectangular, optionally with integral pentrays.
Accessories: snap connectors for linking rectangular folding tables.
90 x 180, H 73 (35 3/8" x 70 7/8", H 28 3/4")
90/110 x 260, H 73 (35 3/8" / 43 1/4" x 102 3/8", H 28 3/4")
100 x 300, H 73 (39 3/8" x 118 1/8", H 28 3/4")

Model group
443 Pinboard/Whiteboard
Compact storage; double-sided board cover in grey felt. Whiteboard with enamelled sheet steel, for use of magnets and pens, with clamp-on pinstrip.
125 x 54, H 190
(49 1/4" x 21 1/4", H 74 3/4")

Timetable
610 range
60/75 x 150, H 73 (23 5/8" / 29 1/2" x 59", H 28 3/4")
60 x 180, H 73 (23 5/8" x 70 7/8", H 28 3/4")
60/75 x 200, H 73 (23 5/8" / 29 1/2" x 78 3/4", H 28 3/4")
75 x 225, H 73 (29 1/2" x 88 5/8", H 28 3/4")

Additional accessories, customized versions and power supply options on request.

All dimensions in cm (inches).
