# Rough Table

## DESCRIPTION

The Rough table is made of a single, solid piece of Suar wood with a thickness of 10-12 cm and a width varying between 80-120 cm.

The Suar wood is a common treesort in Asia and is characterised by its beautiful grain pattern. By cutting the trunks in one piece you get an amazing table showcasing the naturally veins of the wood. The natural shape and the grain of the wood runs beautifully across the table and in some cases the former sprouts of branches and texture of the bark is visible. The non-linear form reflects the natural growth of the tree and makes each table unique. This is a piece of furniture with remarkable durability and strenght.

## MATERIAL/TREATMENT

The table is very durable and yet easy to maintain and comes without any oil treatment. If you wish to oil the table we recommend using the Care Treatements Wood Oil, which can be found in our menu under "Furniture Care".

Note: As the table is made from one piece of wood the table can 'work' depending on humidity and ambient heat, which can lead to changes in the surface, such as rifts and natural leakage of moisture.

# Table Legs

## MAIDEN DESCRIPTION

The Maiden Table legs are elegant and simple table legs that pair easily with any tabletop. Their curved design and slim profile focus attention on the table that they support, yet are interesting enough to be appreciated as individual pieces.

## MATERIAL/TREATMENT

The Maiden table legs are made of cast brass or iron.

## I DO TRESTLE DESCRIPTION

The I Do Trestle legs are a sleek, modern solution for any tabletop. Their simplicity and honest appearance makes them both interesting and minimal, while also highlighting the steel material of which they are made.

## MATERIAL/TREATMENT

The I Do Trestle legs are dining table size and made of steel in white, black, or a natural raw variation.
