Designer

Floris Schoonderbeek

Spring's big blades of grass create a perfect space to seclude oneself for a while without losing the open character of space. Spring is a playful room divider for both indoor and outdoor use. The fresh charisma of the Spring creates an organic partition, where a border is needed.

DeVorm

Specifications

Foot Indoor
Solid ash, Clear

Foot Outdoor
Recycled PE, Black

Blades
PE

Colour
Green shades

Ingredients

Fingerjointed ash footplate

PE grass blade

Powder coated steel plate

DeVorm

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
