hush low chair

design

Hush low is the little brother of the hush chair originally designed to compliment the hush chair but now just as widely used in its own right. Hush low has the same slender internal frame providing a similar elegant shape and fixings for the slender leg options. As with hush, hush low is designed to be comfortable but with an upright positive sit; making it an ideal retreat but perfect for working, reading eating or just taking some time out.

technical

The main body of the hush low chair is constructed with moulded plywood and CMHR foams. The various base options contain solid oak from FSC certified sources, chromed mild steel and brushed stainless steel. *All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

sizes

Hush low chair designed by naughtone

general manufacture description

The Hush low chair innershell is constructed from 1 solid moulded plywood form. The frame is then covered with CMHR foams and fully upholstered over with fabric. The Hush low shell and base is assembled together with dry fixings and the upholstered shell can be easily broken down into separate materials with hand tools.

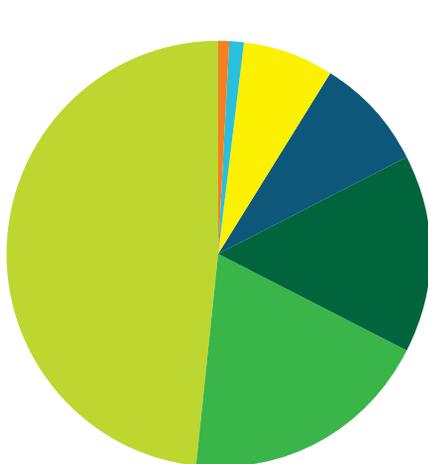

The Hush low chair wooden legs are turned from square blocks of sustainable solid oak. The Oak is sealed with spray matt lacquer. The oak legs have a mild steel subframe which is fabricated and welded together from mild steel bar and mild steel tube. The subframe is finished with a powder coat finish. The subframe and oak legs are assembled together with dry fixings and are easily separated for end of life recycling.

facts

- 100% FSC certified timber
- naughtone is FISP and ISO14001 certified
- 22.3kg Total weight
- 35.2% Recyclable (base, foam, fixings & feet)
- 56.1% Compostable (plywood frame & base)
- 13.4% Recycled content (base, chip foam & fixings)
- 56.1% Reuseable content
- 48.6% Recycled & Recyclable content

contents

- Internal plywood frame (beech ply) - 48.9%
- Foam (CMHR foam) - 19.4%
- Timber sub frame (mild steel) - 15.4%
- Fabric - 8.7%
- Base (solid oak) - 7.2%
- Feet (polypropylene) - < 1%
- Fixings (mild steel) - < 1%
