- Functions as a room within a room
- Engineered to stimulate collaboration
- Alternative to a closed-off meeting room

With its fluid lines, the Niche functions as a room within a room. It is the perfect place to hold a casual meeting or find comfort in one's own thoughts. With its rounded edges, soft cushioning and overhead roof, the Niche is engineered to stimulate collaboration. Though confined in space, thoughts and ideas are to be shared freely. These private capsules provide spaces with an alternative to closed-off meeting rooms when two are placed in front of each other.

Prooff

Options

Types

Type 004.01

Type 004.02

Accessories

A. Lights in roof

Two LED lights can be added in the roof top. Easily dim both lights by touching the stainless steel plate at the top of the back.

B. Socket box

Add a black socket box to the Niche to charge laptops and phones. The socket box is fixed in front of the bottom frame. As power outlets differ from country to country, we only deliver the socket box. Check with your local electrician to supply the suitable outlets for your country.

C. Armrest

Use the upholstered armrest as both an armrest and writing tablet, when turned upside down. The upper side is upholstered in the same fabric as Niche. The writing tablet is finished in Ohmann 1012 leather. The colour is a close match to the fabric. Direct your price request for another colour to our sales department.

D. Niche Wall

This sturdy wall panel easily connects 2 Niches opposite of each other. Creating even more privacy and a booth-like atmosphere. The Niche Wall consists of an inner and outer panel which connects to the metal frame of the seats within the Niches. A TV-screen can be attached onto the inside of the Niche Wall panel.
